

3RD EDITION OF MRI & ULTRASOUND IN VETERINARY MEDICINE

25-26 April 2025, Dubai (UAE)

Welcome!

Erminio Bassi

Esaote Head of Vet Business Organization Esaote's main annual Veterinary meeting started in 2003 with a round table of the most acknowledgeable professionals in veterinary MRI, which helped to define the strategy to adapt our technology to the purpose, and has developed over the years with a growing attendance and customer satisfaction.

In order to reinforce the synergies and complementarity of the MRI and Ultrasound modalities, in 2023 Esaote introduced the 1st MRI and Ultrasound joint meeting in Mexico. In 2024, while maintaining the international scope of the event, we returned to Italy in the splendid surroundings of the Island of Sardinia, where attendees provided excellent reviews of the general program.

For 2025, always ready to reach new horizons, we decided to take the meeting to the charming destination of Dubai in UAE, a melting pot of people and cultures.

The two-day event will include MRI and Ultrasound lectures featuring the most distinguished speakers with proven international appeal.

This year we are also pleased to offer hands-on sessions on both cardiac and abdominal Ultrasound.

Guided by expert veterinarians, each participant interested in ultrasound will be able to attend a practical course according to their professional level, both in abdominal and cardiac, featuring ample scanning time and the review of clinical best practice.

The program also includes social events giving participants the opportunity to discuss lighter topics in a serene and joyful atmosphere.

Enjoy Dubai!
